January 7, 2010

I am writing to attest to the fact that I have been a patient of Drs. Dennis and David Owocki, since I was Associate Pastor of St. Johns Parish in Fenton in the years 1986 to 1989. I began using Dr. Owocki as my dentist then, and have continued to use him to the present. I have always had great confidence in both father and son as dentists who were concerned about my dental care.

A couple of years ago I talked with Dr. David Owocki about a problem that I had with my front teeth. I wore braces at one time, hoping that would close the spaces in my front teeth, but that never happened. I was still very self-conscious about smiling, that people would see the spaces in my teeth and that affect me having my picture taken throughout my life, never wanting to give a complete or board smile.

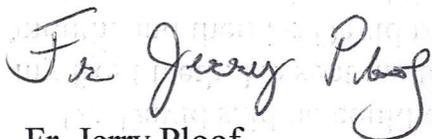

Dr. David said he could correct the problem, by placing jacket crowns on my front teeth. He sent me to an oral surgeon who did some work on my mouth, and then Dr David put jacket crowns on my six front top teeth.

It was not painful, and the staff in his office were wonderful people who really showed care and concern for me as patient.

The end result was astounding, I can now smile and be proud of my smile, my teeth are perfect and I can smile with confidence. This is important to make as a priest, for my professional life is personally involved with people daily.

I would highly recommend Dr. David Owocki and his staff and recommend this type of dental work for anyone who has problems such as mine, the end result made all the dental work worthwhile.

Sincerely;

Fr. Jerry Ploof
